

Pressure Recorder

DESCRIPTION

This is used for records of continuous monitoring in the process of pressures or for recording & instructing pressures in the place to require explosion proof such as places for handling gas/chemical plants, etc.

SPECIFICATIONS

- Case&Cover : CAST-AL
- Connection : Brass + Cr Plating
- Element : SUS304 / SUS316 / Bronze
- Capillary : SUS316

FEATURES

- Records for monitoring continuously in the process of pressures
- For records & instructing pressures in the places to require explosion proof as places for handling gas/chemical plants, etc
- Simple operation & easy handling
- Suitable for explosion proof places without power
- Various options according to recording time of measurement & pressure ranges
- Accurate quality control & measuring management with continuous recording pressure variation on the recording paper in operation
- The case of this recorder is strong against shock as strongly made of CAST-AL
